

## **Silicon Turnkey Solutions (STS) will be exhibiting at the GSA Silicon Summit on Wednesday, April 15 at the computer History Museum in Mountain View, CA.**

STS will be exhibiting technology needed to meet today's demands for testing of comprehensive RF, mixed signal, FPGA's and ASIC components in the high frequency RF and Microwave domains. We have a dedicated Silicon Valley team for Assembly, Test, Reliability and Qualification to guarantee your product success.

With over 30 years of experience, STS is known for their expertise in managing full "turnkey" programs from design to qualified product delivery. Our facility boasts the industry's most extensive infrastructure in the US to cover all your new product development requirements in industrial, automotive, and mil/aero.

Please visit us at booth #18 in the GSA Silicon Summit exhibit hall. For further information or to schedule a meeting in advance, please [Click Here](#)

### About STS:

Silicon Turnkey Solutions (STS) is an industry recognized collaborative partner that integrates design, engineering, manufacturing, test, and qualification. We provide operational expertise to supply leading edge technology and services that enable our semiconductor customers to meet demanding time-to-market pressure, cost, and technical challenges in today's consumer, military and aerospace markets. Additional information can be found at [www.sts-usa.com](http://www.sts-usa.com). STS is part of the Micross family of companies, which includes Micross Components (<http://www.micross.com>) and Eltek Semiconductors Ltd. (<http://www.eltek-semi.com>)
